## Test Suites

### ✓ Analysis Module – Customer Analysis

3.15s

- ✓ admin can view customer analysis
- ✓ client cannot access customer analysis

### ✓ Analysis Module – Inventory Analysis

0.38s

- ✓ admin can view inventory analysis
- ✓ client cannot access inventory analysis

### ✓ Analysis Module – Sales Analysis

0.35s

- ✓ admin can view sales analysis
- ✓ client cannot access sales analysis

### ✓ Auth Module – Admin User Controller

0.82s

- ✓ admin can list users
- ✓ admin can create user
- ✓ admin can view specific user
- ✓ admin can update user
- ✓ admin can delete user

### ✓ Auth Module – Authentication Controller

0.63s

- ✓ user can register with default client role
- ✓ user cannot login with invalid credentials
- ✓ user can login and receive token
- ✓ user can logout successfully

## ✓ Auth Module – Role Middleware

0.34s

- ✓ it denies access if user does not have required role
- ✓ it allows access if user has required role

## ✓ Orders Module – Orders Controller

0.64s

- ✓ client can place order
- ✓ client can view own orders
- ✓ admin can view all orders
- ✓ admin can update order status

## ✓ Products Module – Categories Controller

0.75s

- ✓ admin can create category
- ✓ admin can update category
- ✓ admin can delete category
- ✓ client cannot create category
- ✓ guest can view active categories only

## ✓ Products Module – Products Controller

0.86s

- ✓ admin can create product

✓ admin can update product

✓ admin can delete product

✓ client cannot create product

✓ guest can search active products

## Test Coverage Areas

### Authentication & Authorization

- User registration with automatic client role assignment
- Login validation and token generation
- Logout functionality and token invalidation
- Role-based middleware access control (admin vs client)

### User Management (Admin)

- Create, read, update, and delete user accounts
- List users with pagination
- Role assignment and validation

### Product & Category Management

- CRUD operations for products and categories (admin-only)
- Active product/category filtering for guests
- Search functionality for products
- Authorization checks preventing client access

### Order Management

- Client order placement (COD)
- Client viewing their own orders
- Admin viewing all orders
- Admin updating order status

### Analytics & Reporting

- Customer analysis (admin-only)
  - Inventory analysis (admin-only)
  - Sales analysis (admin-only)
  - Authorization checks preventing client access
- 

## Key Achievements

- **100% Pass Rate:** All 31 tests passed successfully without any failures
  - **Comprehensive Coverage:** 4 modules thoroughly tested with 84 assertions
  - **Role-Based Security:** Proper authorization testing ensuring admin/client separation
  - **Fast Execution:** Complete test suite runs in under 9 seconds
  - **API Reliability:** All CRUD operations validated across multiple modules
- 

## Testing Framework

**Framework:** PHPUnit (Laravel's default testing framework)

**Test Type:** Feature tests (integration tests simulating HTTP requests)

**Database:** In-memory SQLite with RefreshDatabase trait for isolated tests

**Authentication:** Laravel Sanctum for API token testing
